The Road to Enlightenment

Littering a dark and dreary road lay the past relics of browser-specific tags, incompatible DOMs, broken CSS support, and abandoned browsers.

We must clear the mind of the past. Web enlightenment has been achieved thanks to the tireless efforts of folk like the W3C, WaSP, and the major browser creators.

The CSS Zen Garden invites you to relax and meditate on the important lessons of the masters. Begin to see with clarity. Learn to use the time-honored techniques in new and invigorating fashion. Become one with the web.

So What is This About?

There is a continuing need to show the power of CSS. The Zen Garden aims to excite, inspire, and encourage participation. To begin, view some of the existing designs in the list. Clicking on any one will load the style sheet into this very page. The HTML remains the same, the only thing that has changed is the external CSS file. Yes, really.

CSS allows complete and total control over the style of a hypertext document. The only way this can be illustrated in a way that gets people excited is by demonstrating what it can truly be, once the reins are placed in the hands of those able to create beauty from structure. Designers and coders alike have contributed to the beauty of the web; we can always push it further.

Participation

Strong visual design has always been our focus. You are modifying this page, so strong CSS

CSS arba pakopiniai stilių šablonai

- » Nusako, kaip turi būti atvaizduoti **html elementai**
- » Tai nėra programavimo ar žymėjimo kalba - tai stiliau failų kalba

Galioja tokia logika:

- » **Surask** HTML elementą/-us, kuriam taikysis stilius
- » Nurodyk **savybės**, kurias keisi
- » Nurodyk savybių **reikšmes**

Stiliaus taisyklė

Yra 3 būdai, kaip įterpti stilių:

1. **<style>** žymė dokumento head sekcijoje
2. Inline stiliai su elemento atributu: `style=".."`
3. Susietas failas per `<link rel="stylesheet" href="style.css">`

Surandame pagal **elemento pavadinimą**:

```
p { color: blue; }
```

```
<p class="example" id="example">Paragrafas su stiliumi</p>
```

Surandame pagal elemento **.klase**:

```
.example { color: blue; }
```

```
<p class="example" id="example">Paragrafas su stiliumi</p>
```

Surandame pagal elemento **#id**:

```
#example { color: blue; }
```

```
<p class="example" id="example">Paragrafas su stiliumi</p>
```
