## Bloko centravimas:

- » Nurodome bloko plotį su width
- » Nustatome kairę ir dešinę su *margin: 0 auto;*

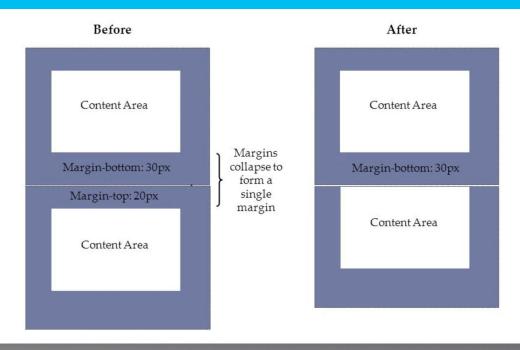

## Margin ypatybės

- 1. Paraštės (en. margin) visada permatomos
- Fono spalva/paveikslėlis pritaikomas turiniui ir padding sričiai
- 3. Šalia esančių elementų viršutinės ir apatinės paraštės yra sujungiamos

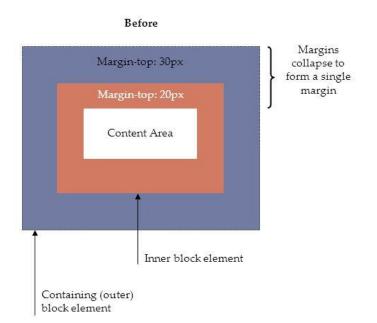

## Margin collapse: one after another

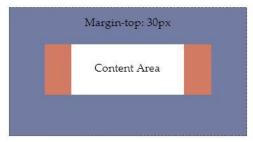

## Margin collapse: contained elements

#### After

\* Note: only applies if there are no borders or padding separating the margins.
